

Pin Items to Start Menu or Taskbar

The Start menu in Windows 10 is a great place to pin your favorite apps especially since you can take advantage of live tiles. However, if you have a few apps that you frequently use and want to open right away from the desktop, we recommend pinning them to the taskbar. It's very easy.

Here are two ways to pin an app to the Windows 10 taskbar:

1. From the app list or the Start menu, right-click an app and select **Pin to taskbar**.
2. When you open an application, its icon appears in the taskbar. Right-click that icon and select **Pin this program to taskbar**
